DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, the recitation that the high-elasticity base material has an “upper range” Poisson ratio and Young’s modulus is indefinite because it is not known what values applicant would consider “upper range.” Thus, the public would not be able to ascertain how high the ratio must be in order to infringe the claim. Also, for this reason, it is impossible at this time to make a comparison of these claims with the prior art. It would be impossible to ascertain whether a given prior art reference anticipated these claims.

Response to Arguments

1. Applicant's arguments filed June 21, 2004 have been fully considered but they are not persuasive. Applicant states that “the Poisson ratio is always between 0.0 and 0.5 for materials having isotropic mechanical properties. Applicants further submit that it is well known in the art that materials with a Poisson ratio approaching the ‘upper range’ (as recited in claim 1, as amended) of 0.5 are almost incompressible materials that retain their volume regardless of the applied stress.” But this does nothing to demonstrate that the limitation “upper range” has an

agreed-upon meaning in the art. Indeed, applicant does not specify how close to 0.5 a Poisson ratio must be to qualify as "upper range." Therefore, as stated above, it is not possible to ascertain the metes and bounds of the claim.

Conclusion

2. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
